SUBJECT INDEX

AgGaS
high temperature heat capacity and Grüneisen functions in $AgGaS_2$, L7
Alkali metals
synthesis of ternary nitrides from alkali metals, binding with Ta, $MTaN_2$ with M ≡ Na, K, Rb and Cs, 147
Aluminium
investigation of $Fe_{3-x}V_xAl$ alloys with DO_3-type structure by X-ray magnetostatic and Mössbauer effect methods, 127
magnetic structure of $EuAl_2Si_2$, 327
nitriding of aluminium oxide in a microwave discharge, L25
thermodynamic optimization of Al–Y system, 213
Arsenic
solid state phase equilibria in Pt–Ga–As system, 233
structure, magnetic and constitutional studies of new family of ternary phases based on compound Fe_3GaAs, 103
Barium
degradation of superconductivity of superconducting oxide $YBa_2Cu_3O_{(7-x)}$ in aqueous solutions, L1
oxochromate of formula $BaNi_2Cr_8O_{15}$, L11
phase relations in vicinity of compound $YBa_2Cu_3O_{7-\delta}$ at constant O pressure, 49
study of phase relations and superconductivity in Ho_2O_3–BaO–CuO ternary system, 121
superconductivity of $YBa_2Cu_3O_y$–Ag system, L19
Boron
X-ray structure refinement of single crystals of CeB_6 and $Ce_{0.75}La_{0.25}B_6$ solid solution grown by solution method, 309
Caesium
Cs_3GeF_7, new fluorogemanate(IV), 137
Calorimetric
calorimetric studies of Ce–Cu and Ce–Mg–Cu alloys, 89
Carbon fibre
deposition of TiC carbon fibres by reactive CVD, influence of experimental conditions on characteristics of fibres obtained, 1
Catalysis
properties of perovskite-type oxides, studies in catalysis, 261
Cerium
calorimetric studies of Ce–Cu and Ce–Mg–Cu alloys, 89
X-ray structure refinement of single crystals of CeB_6 and $Ce_{0.75}La_{0.25}B_6$ solid solution grown by solution method, 309
Chemical vapour deposition
deposition TiC on carbon fibres by reactive CVD, influence of experimental conditions on characteristics of fibres obtained, 1
Chromium
oxochromate of formula $BaNi_2Cr_8O_{15}$, L11
Complexes
spectroscopic study of rare earth chlorocomplexes in propylene carbonate, 75
Copper
calorimetric studies of Ce–Cu and Ce–Mg–Cu alloys, 89
degradation of superconductivity of superconducting oxide $YBa_2Cu_3O_{(7-x)}$ in aqueous solutions, L1
determination of Cu activity of liquid Cu–La alloys, 319
phase relations in vicinity of compound $YBa_2Cu_3O_{7-\delta}$ at constant O pressure, 49
study of phase relations and superconductivity in Ho_2O_3–BaO–CuO ternary system, 121
superconductivity of $YBa_2Cu_3O_y$–Ag system, L19
Dysprosium
preparation, crystal structure and magnetic properties of $Dy_5Ru_{19}P_{12}$

© Elsevier Sequoia/Printed in The Netherlands

and isotypic lanthanoid ruthenium phosphides, 299
spectroscopy and crystal structure of Ho and Dy complex compounds with glycine, $Ln(Gly)_3(H_2O)_3(ClO_4)_3$, 33

Electron beam
tensile properties and microstructures of electron beam welded Mo and TZM, 337
Europium
magnetic structure of $EuAl_2Si_2$, 327

Fluorine
Cs_3GeF_7, new fluorogemanate(IV), 137

Gadolinium
hyperfine fields at Fe and C nuclei in $Gd_2Fe_{14}C$, 59
Gallium
solid state phase equilibria in Pt–Ga–As system, 233
structural, magnetic and constitutional studies of new family of ternary phases based on compound Fe_3GaAs, 103
Germanium
crystallographic and magnetic structure of Tb_3Ge_5, 279
Cs_3GeF_7, new fluorogemanate(IV), 137
$LaPt_2Ge_2$, monoclinic variant of tetragonal $CaBe_2Ge_2$-type structure, 271
Glycine
spectroscopy and crystal structure of Ho and Dy complex compounds with glycine, $Ln(Gly)_3(H_2O)_3(ClO_4)_3$, 33
Grüneisen function
high temperature heat capacity and Grüneisen functions in $AgGaS_2$, L7

Holmium
spectroscopy and crystal structure of Ho and Dy complex compounds with glycine, $Ln(Gly)_3(H_2O)_3(ClO_4)_3$, 33
study of phase relations and superconductivity in Ho_2O_3–BaO–CuO ternary system, 121
Hydrogen
equilibrium H pressures in V alloys, 167
high accuracy volumetric determination of H in rare earth hydrides, 205
H absorption and phase transition in rapidly quenched La–Ni alloys, 197

Intermetallics
Mössbauer spectroscopy study of $RFe_{12-x}V_x$ intermetallics, 223
ternary intermetallic compounds synthesized by molten-metal-solution growth, 189
Iron
hyperfine fields at Fe and C nuclei in $Gd_2Fe_{14}C$, 59
investigation of $Fe_{3-x}V_xAl$ alloys with DO_3-type structure by X-ray magnetostatic and Mössbauer effect methods, 127
Mössbauer spectroscopy study of $RFe_{12-x}V_x$ intermetallics, 223
structural, magnetic and constitutional studies of new family of ternary phases based on compound Fe_3GaAs, 103

Lanthanides
double sulphate of Pu(III) and lanthanides with Na, 161
Lanthanum
determination of Cu activity of liquid Cu–La alloys, 319
H absorption and phase transition in rapidly quenched La–Ni alloys, 197
$LaPt_2Ge_2$, a monoclinic variant of tetragonal $CaBe_2Ge_2$-type structure, 271
X-ray structure refinement of single crystals of CeB_6 and $Ce_{0.75}La_{0.25}B_6$ solid solution grown by solution method, 309
Lithium
thermal and crystallographic characterization of $Li_2Mg_2(SO_4)_3$ in system Li_2SO_7–$MgSO_4$, 67

Magnesium
calorimetric studies of Ce–Cu and Ce–Mg–Cu alloys, 89
thermal and crystallographic characterization of $Li_2Mg_2(SO_4)_3$ in system Li_2SO_7–$MgSO_4$, 67
Magnetism
crystallographic and magnetic structure of Tb_3Ge_5, 279
magnetic anisotropy in $ThMn_{12}$-type compounds studied by ^{155}Gd Mössbauer spectroscopy, 215

magnetic structure of $EuAl_2Si_2$, 327
preparation, crystal structure and magnetic properties of $Dy_5Ru_{19}P_{12}$ and isotypic lanthanoid ruthenium phosphides, 299
structural, magnetic and constitutional studies of new family of ternary phases based on compound Fe_3GaAs, 103
Microwave
nitriding of aluminium oxide in microwave discharge, L25
Molybdenum
tensile properties and microstructures of electron beam welded Mo and TZM, 337
Mössbauer effect
investigation of $Fe_{3-x}V_xAl$ alloys with DO_3-type structure by X-ray, magnetostatic and Mössbauer effect methods, 127
magnetic anisotropy in $ThMn_{12}$-type compounds studied by ^{155}Gd Mössbauer spectroscopy, L15
Mössbauer spectroscopy study of $RFe_{12-x}V_x$ intermetallics, 223

NaCl-type solids
thermal symmetry breaking transition in NaCl-type solids, 229
Nickel
H absorption and phase transition in rapidly quenched La–Ni alloys, 197
oxochromate of formula $BaNi_2Cr_8O_{15}$, L11
Niobium
conventional and high resolution transmission electron microscopy of $NbC_{0.88}$ single crystals, 17
Nitriding
nitriding of aluminium oxide in microwave discharge, L25

Perovskite-type oxides
properties of perovskite-type oxides, bulk and surface studies, 251
studies in catalysis, 261
Phosphorus
preparation, crystal structure and magnetic properties of $Dy_5Ru_{19}P_{12}$ and isotypic lanthanoid ruthenium phosphides, 299
Platinum
$LaPt_2Ge_2$, a monoclinic variant of tetragonal $CaBe_2Ge_2$-type structure, 271
solid state phase equilibria in Pt–Ga–As system, 233
Plutonium
double sulphate of Pu(III) and lanthanides with Na, 161
Propylene carbonate
spectroscopic study of rare earth chlorocomplexes in propylene carbonate, 75

Rapid quenching
H absorption and phase transition in rapidly quenched La–Ni alloys, 197
Rare earths
high accuracy volumetric determination of H in rare earth hydrides, 205
spectroscopy study of rare earth chlorocomplexes in propylene carbonate, 75
Ruthenium
preparation, crystal structure and magnetic properties of $Dy_5Ru_{19}P_{12}$ and isotypic lanthanoid ruthenium phosphides, 299

Silicon
ammono-thermal synthesis of crystalline siliciumnitridimide, Si_2N_2NH, 241
magnetic structure of $EuAl_2Si_2$, 327
Silver
superconductivity of $YBa_2Cu_3O_y$–Ag system, L19
Sulphates
double sulphate of Pu(III) and lanthanides with Na, 161
thermal and crystallographic characterization of $Li_2Mg_2(SO_4)_3$ in system Li_2SO_4–$MgSO_4$, 67
Superconductivity
degradation of superconductivity of superconducting oxide $YBa_2Cu_3O_{(7-x)}$ in aqueous solutions, L1
phase relations in vicinity of compound $YBa_2Cu_3O_{7-\delta}$ at constant O pressure, 49
study of phase relations and superconductivity in Ho_2O_3–BaO–CuO ternary system, 121
superconductivity of $YBa_2Cu_3O_y$–Ag system, L19
Symmetry
thermal symmetry breaking transition in NaCl-type solids, 229

Tantalum
synthesis of ternary nitrides from alkali metals, binding with Ta, $MTaN_2$ with M = Na, K, Rb and Cs, 147
TEM
conventional and high resolution transmission electron microscopy of $NbC_{0.88}$ single crystals, 17
Terbium
crystallographic and magnetic structure of Tb_3Ge_5, 279
Thermodynamic
thermodynamic optimization of Al–Y system, 213
Titanium
deposition of TiC on carbon fibres by reactive CVD, influence of experimental conditions on characteristics of fibres obtained, 1
X-ray measurement of surface stress of U–0.75wt.%Ti alloy rods, 179
TZM
tensile properties and microstructures of electron beam welded Mo and TZM, 337

Uranium
X-ray measurement of surface stress of U–0.75st.%Ti alloy rods, 179

Vanadium
equilibrium H pressures in V alloys, 167
investigation of $Fe_{3-x}V_xAl$ alloys with DO_3-type structure by X-ray, magnetostatic and Mössbauer effect methods, 127
Mössbauer spectroscopy study of $RFe_{12-x}V_x$ intermetallics, 223

X-ray
investigation of $Fe_{3-x}V_xAl$ alloys with DO_3-type structure by X-ray, magnetostatic and Mössbauer effect methods, 127
X-ray measurement of surface stress of U–0.75wt.%Ti alloy rods, 179
X-ray structure refinement of single crystals of CeB_6 and $Ce_{0.75}La_{0.25}B_6$ solid solution grown by solution method, 309

Yttrium
degradation of superconductivity of superconducting oxide $YBa_2Cu_3O_{(7-x)}$ in aqueous solutions, L1
phase relations in vicinity of compound $YBa_2Cu_3O_{7-\delta}$ at constant O pressure, 49
superconductivity of $YBa_2Cu_3O_y$–Ag system, L19
thermodynamic optimization of Al–Y system, 213
